

Doe & Ingalls of North Carolina Overview

Doe & Ingalls of NC and its operating centers in MD, FL and CA provide biotechnology companies with the chemical services, expertise and high-quality chemicals they need to meet their compliance, risk and operational goals. Focusing on the distinct yet complementary industries of biotechnology and electronic manufacturing, Doe & Ingalls is able to share industry-specific expertise with its customers and quickly adopt supply chain best practices between industries.

Doe & Ingalls has four centers to serve our biotechnology customers: Jessup, Maryland; Durham, North Carolina; Tampa, Florida; and Riverside, California (opening April 2009). Our facilities are cGMP-compliant and operate under proven ISO 9001: 2000 procedures.

Services

Doe & Ingalls of NC's experienced, knowledgeable staff is committed to meeting its customers' complex chemical supply chain needs from product development through full-scale manufacturing. Through person-to-person interaction, Doe & Ingalls of NC is able to work with customers to develop individually tailored solutions that help companies mitigate supply chain risk and reduce total cost of ownership. The end result is a secure, robust chemical supply chain.

Smart Sourcing With a deep knowledge of the chemical industry and a strong network of regulatory friendly suppliers, Doe & Ingalls of NC ensures your supply chain meets your regulatory, performance and operational requirements. Doe & Ingalls of North Carolina offers a range of biomanufacturing raw materials:

- Media and media supplements
- Carbohydrates
- Salts
- Bioprocessing Reagents
- Biological buffers
- Custom solutions
- Acids/Caustics
- Specialty Organics
- Solvents
- Cleaning chemistries

Risk Mitigation Planning Doe & Ingalls is focused on developing a secure supply chain with its customers. Attention is paid to risk at every level of interaction, from sourcing to chemical management to everyday contact. Doe & Ingalls of NC also proactively shares market intelligence and can work with its customers to create customized risk mitigation plans.

cGMP Compliant Hazardous Goods Storage Local service centers offer cGMP-compliant chemical storage for your hazardous, non-hazardous and 2–8°C products. In addition to meeting IPEC standards, we follow the 21 CFR 210 and 211 storage and handling guidelines. These systems, along with state-of-the-art facilities, protect your materials.

Chemical Management Responsive service, management of change and supplier management keep your supply chain running smoothly. Customized chemical management programs, ranging from stocking arrangements to consignment inventory programs and Kanban processes, allow you to tailor your chemical supply chain to your operational goals.

In addition to these services, Doe & Ingalls of NC offers sampling programs to smooth the testing process, reducing costs; returnable container fleet management; and services that ease the receiving process, such as repalletization.

How to Order

You can order from Doe & Ingalls of NC by phone or fax.
